

Birdland Audio Presents

The Odéon-lite 24/96 DAC with Solid-Tube™ Technology

The first DAC to virtually create 24 bits out of 16 bit recordings

Odéon-lite Design Highlights:

- Support for 24bit / 96kHz DVD Audio.
- Digital filter upgrades data to 24 bits before conversion.
- Birdland Audio's famous Solid-Tube™ output stage.
- RCA, BNC, Fiber and XLR AES/EBU inputs.
- Separate transformers for analog and digital supplies.
- Local supply and VCO virtually eliminate jitter.
- Oversized power supply capacitors.
- Multiple power conditioners for internal stages.
- High quality components and connectors.
- Quality analog volume control permits direct connection to power amplifier or straight gain to preamplifier.

Manufacturer Suggested Retail Price: \$980

"The Odéon-lite has one of the highest performance to price ratios of any DAC I've heard to Date!"

Mike Hobson, President of Classic Records

Odéon-lite 24/96 DAC

We all know the timeless adage “great things come in small packages”. This turns out to be an understatement when applied to Birdland Audio’s latest Odéon-lite 24 bit Digital to Analog Converter.

Based on the highly acclaimed Odéon-m1 electronics (\$3500), the new Odéon-lite sports a smaller case (1.6”x 8.9”x6.5”) without the analog preamplifier section but retains or surpasses the performance of the Odéon-m1. And, amazingly, the price is reduced to \$980.

Featuring our famous **Solid-Tube™** output stages, dual transformers for truly separated power supplies and innovative digital processing, the Odéon-lite not only delivers the finest performance possible from 24/96 but also the greatest possible from 16 bit CDs. Most listeners simply have not heard their CD collection until they heard it through the Odéon-lite.

The Odéon-lite reflects Birdland Audio’s latest research in digital filtering and digital to analog conversion, We believe

we are the first to upgrade 16 bits to 24 bits before conversion, which makes it the first DAC to virtually recreate 24 bits of detail from 20, 18 or 16 bit recordings.

For the last couple of years, many audiophiles have been sitting on the fence waiting for the next high-end audio format to surface. The Odéon-lite is the pie in the sky that the fence sitters have been waiting for. It will transform the CD collection they already own to as close to nirvana as possible and, at the same time, bring tears to their eyes as they experience high resolution 24/96 DVD audio.

Birdland Audio invites comparison of the Odéon-lite digital to analog converter against any DAC at any price.

For more information, contact your dealer and visit our web site at <http://www.birdland.com>.

The Odéon-lite is designed and manufactured in Monterey, California.
